Project Name	DarshanEase - Temple Darshan Ticket Booking App
Maximum Marks	2 Marks

Problem - Solution Fit Canvas: DarshanEase

Problem - Solution Fit Canvas: DarshanEase

Canvas Detail:

Customer Segments - Regular local devotees visiting for daily/weekly darshan - Elderly and differently-abled devotees - Outstation pilgrims and tourists visiting for festivals - Devotees booking special poojas/sevas for occasions	Problem / Root Cause - No centralized system to check slot availability across temples - Manual, first-come-first-served queues with no fair limits - Sudden demand spikes during festivals overwhelm counters
---	---

	• Lack of transparency leads to touting by unofficial agents
Trigger • An upcoming festival, special pooja, or family milestone • Planning an outstation pilgrimage trip in advance • Wanting to avoid long physical queues on the visit day	Emotional Response • Anxiety about missing darshan despite travelling far • Frustration with long, uncertain waiting times • Stress from last-minute, unplanned booking
Existing Alternatives (Online & Offline) • Offline: standing in physical queues, calling temple offices • Offline: relying on local agents/touts for quicker access • Online: individual temple websites that are slow or unreliable • Online: word-of-mouth via social media/community groups	Your Solution - DarshanEase • Unified app for real-time slot booking across multiple temples • QR-code based, ID-verified e-tickets to prevent touting • Special quota and assisted booking for elderly/differently-abled • Multilingual interface and live queue/wait-time status
