

Project Report Format

1. INTRODUCTION

1.1 Project Overview

Darshan Ease is a web-based temple darshan ticket booking system developed using the MERN Stack (MongoDB, Express.js, React.js, Node.js). It allows users to register, view temples, select darshan slots, book tickets, and manage their bookings online.

1.2 Purpose

- To simplify temple darshan booking.
- To reduce long waiting queues.
- To provide an easy online booking experience.
- To improve transparency and convenience for devotees.

2. IDEATION PHASE

2.1 Problem Statement

Traditional temple ticket booking involves long queues, time consumption, and inconvenience. There is a need for an online platform that enables devotees to book darshan tickets from anywhere.

2.2 Empathy Map Canvas

Users Think

- I want quick booking.
- I don't want to stand in queues.

Users Feel

- Frustrated by waiting.
- Happy with online booking.

Users Say

- Booking should be simple.
- Payment should be secure.

Users Do

- Search temples.
- Select slot.
- Book tickets online.

2.3 Brainstorming

Possible solutions considered:

- Online ticket booking
- Temple search
- Slot availability
- Online payment
- Booking history
- Admin management

3. REQUIREMENT ANALYSIS

3.1 Customer Journey map

User Registration

Login

Browse Temples

Select Temple

Choose Darshan Slot

Book Ticket
Make Payment
Download Ticket

3.2 Solution Requirement

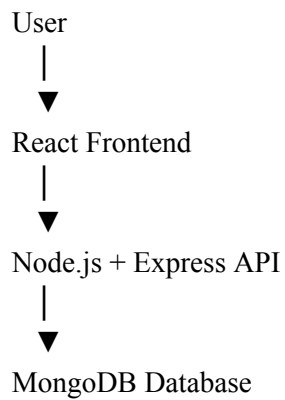

Functional Requirements

- User Registration
- Login
- Temple Listing
- Slot Booking
- Payment
- Booking History

Non-Functional Requirements

- Fast performance
- Secure authentication
- Responsive design
- Easy navigation

3.3 Data Flow Diagram

3.4 Technology Stack

Component	Technology
Frontend	React.js
Backend	Node.js
Framework	Express.js
Database	MongoDB
Authentication	JWT
Styling	CSS / Bootstrap
Version Control	Git & GitHub

4. PROJECT DESIGN

4.1 Problem Solution Fit

Problem:

- Manual booking process

Solution:

- Online temple booking system with slot management.

4.2 Proposed Solution

The system provides:

- User Registration
- Secure Login
- Temple Selection
- Slot Booking
- Ticket Generation
- Booking History

4.3 Solution Architecture

User

React Frontend

Express Server

MongoDB Database

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

Phase	Activity
Week 1	Requirement Analysis
Week 2	UI Design
Week 3	Backend Development

Week 4	Frontend Development
--------	----------------------

Week 5	API Integration
--------	-----------------

Week 6	Testing
--------	---------

Week 7	Deployment
--------	------------

6. FUNCTIONAL AND PERFORMANCE TESTING

6.1 Performance Testing

Test	Result
Login Test	Passed
Registration Test	Passed
Booking Test	Passed
Database Test	Passed

API Testing	Passed
-------------	--------

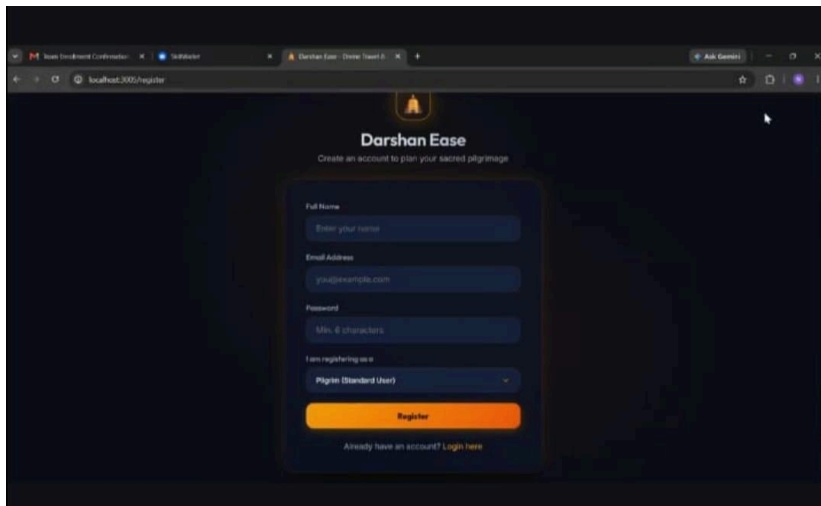

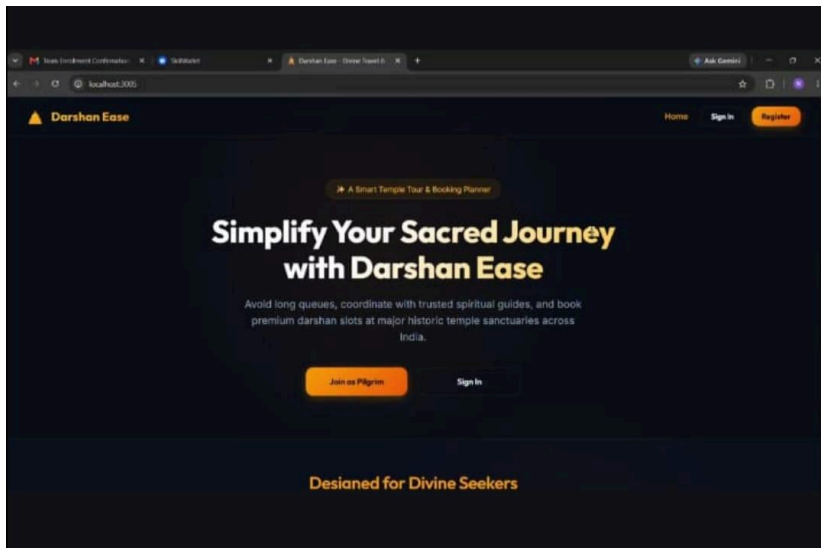

Responsive UI	Passed
---------------	--------

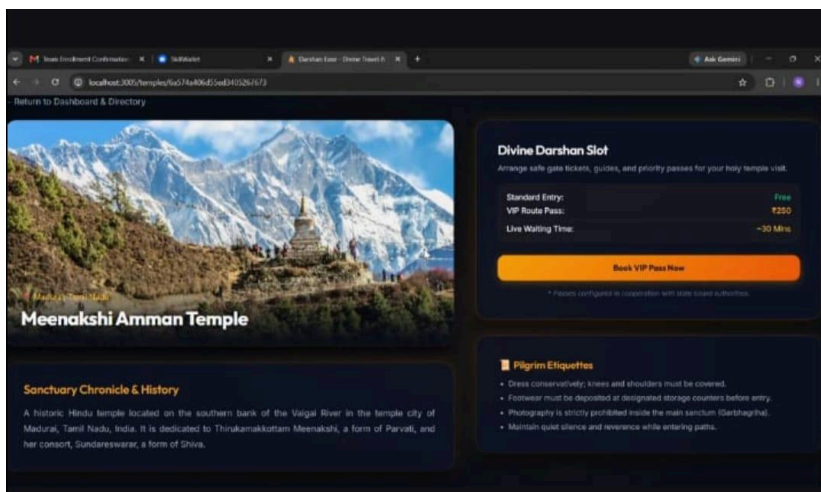

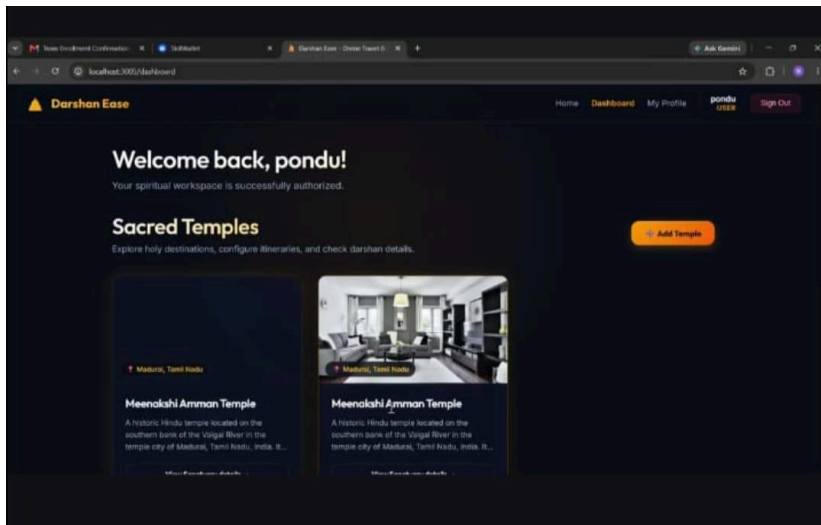

7. RESULTS

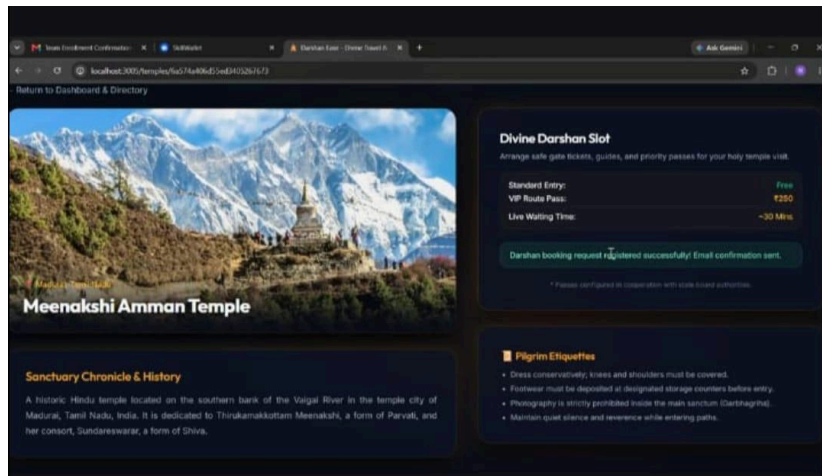

7.1 Output Screenshots

Include screenshots of:

- Home Page
- Login Page
- Register Page
- Temple List
- Temple Details
- Slot Selection
- Booking Page
- Payment Page
- Booking History
- Admin Dashboard (if available)

8. ADVANTAGES & DISADVANTAGES

Advantages

- Easy online booking
- Saves time
- Secure login
- User-friendly interface
- Accessible anytime
- Digital booking history

Disadvantages

- Requires internet connection
- Depends on server availability
- Online payment required

9. CONCLUSION

Darshan Ease successfully simplifies the temple darshan booking

process. It provides an efficient, secure, and user-friendly platform that minimizes waiting time and enhances the overall experience for devotees.

10. FUTURE SCOPE

- **Mobile Application**
- **QR Code Ticket Verification**
- **Online Donations**
- **Multiple Language Support**
- **AI-based Crowd Prediction**
- **Live Darshan Streaming**
- **SMS & Email Notifications**

11. APPENDIX

Source Code(if any)

Attach the complete MERN project source code .

Dataset Link

If no external dataset is used:

No external dataset used. Data is stored in MongoDB.
