

Full Stack Development with MERN

Project Documentation format

1. Introduction

- Project Title: **DARSHANEASE**
 - Team Members:
 - Chilakala Veera Narayanamma – UI/UX Designer
 - Y Vijaya Lakshmi – Frontend Developer
 - Eragaraju Nagalakshmi– Backend Developer
 - Dugguluru Tejaswini– Database Developer

2. Project Overview

Purpose:

DarshanEase – Temple Darshan Booking System is a full-stack MERN web application developed to simplify the temple darshan booking process. It allows users to register, log in, view available temples and book darshan slots online. The system helps reduce waiting time and provides an efficient booking experience for devotees.

Features:

- User Registration and Login
- View Temple Details
- Online Darshan Slot Booking
- Booking History
- Admin Dashboard
- Donation Management

- Notifications
- Responsive User Interface

3. Architecture

- Frontend:

React

React Router

Axios

- Backend:

Node.js

Express.js

REST APIs

- Database:

- MongoDB

- Collections:

- Users

- Vendors

- Procurement

- Reports

4. Setup Instructions

- Prerequisites:

Node.js

- npm
- MongoDB
- VS Code
- Git

- Installation:

Step 1

```
git clone <repository-link>
```

Step 2

```
cd project-folder
```

Step 3

```
npm install
```

Step 4

Create .env

Example:

```
MONGO_URI=your_mongodb_connection
```

```
JWT_SECRET=your_secret
```

```
PORT=5000
```

5. Folder Structure

- Client:

- client/
 - src/
 - components/
 - pages/
 - services/
 - App.js
 - package.json
- Server:
 - server/
 - routes/
 - controllers/
 - models/
 - middleware/
 - config/
 - server.js
 - package.json

6. Running the Application

Backend

- cd server
- npm start

Frontend

- cd client
 - npm start
-

7. API Documentation

Example table:

Method	Endpoint	Description
POST	/login	User Login
POST	/register	Register User
GET	/vendors	Get Vendors
POST	/vendors	Add Vendor
PUT	/vendors/:id	Update Vendor
DELETE	/vendors/:id	Delete Vendor

8. Authentication

- JWT Authentication
- Login successful.
- Protected APIs token

10. Testing

- Frontend manually tested.
- Backend APIs tested using Postman.
- CRUD operations verified successfully.

11. Screenshots or Demo

<https://drive.google.com/file/d/1xjLnWyYGMGiwVqJCNfArYVw2ktsjZN9W/view?usp=drivesdk>

12. Known Issues

- **Minor responsive issues on mobile.**
- **Some features are under development.**
- **Error messages need improvement.**

13. Future Enhancements

- Email Notifications
- AI-based Vendor Prediction
- Real-time Dashboard
- PDF Report Download
- Multi-user Roles
- Dark Mode
